***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Humphrey (6,422,390). Humphrey discloses a pack for compact storage and sale in stacks with others of the same construction comprising a diffuser (10, 11) including a glass body having an opening (22) with a convex outer surface, a concave inner surface and an annular rim (14) and a frame made of cardboard having substantially parallel opposing faces (16, 17) each formed with a generally circular central opening (23, 30) of a diameter less than the diameter of the diffuser. The diffuser is mounted to the frame with its rim captured between the frame faces and with its body protruding out of one of the frame faces openings. Humphrey further discloses the frame is rectangular and comprises four sides (Figures 1-6).

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Humphrey (6,422,390) in view of Hutchison (6,439,743). Humphrey discloses the pack for compact storage

and sale in stacks with others of the same construction as above having all the limitations of the claims. To the extent that Humphrey fails to a diffuser having a convex outer surface and a concave inner surface, Hutchison teaches a diffuser (50) having a convex outer surface and a concave inner surface. It would have been obvious to one having ordinary skill in the art at the time the invention was made in view of Hutchison to modify the pack of Humphrey so the pack is constructed to receive a diffuser having a convex outer surface and a concave inner surface to allow the pack of Humphrey for holding various kinds of lighting fixture.
